

**Single Stream Recycling Is Here!** On May 13<sup>th</sup> the Moultonborough Waste Management Facility transforms from a full sorting recycling facility to a single stream recycling facility. So what does that mean for you? No more need to have multiple containers in your home to keep your recyclables separate and no more running from spot to spot to dispose of your recyclable items separately at the Waste Management Facility! All recyclables - paper, cardboard, glass, aluminum and steel cans, plastic, etc. can all be placed in one container or paper bag and tossed away in the designated container! The only other container you'll need is your regular one for your household trash and garbage!

For more details about this exciting change please visit the facility website at <https://moultonboroughnh.gov> or talk with a facility attendant.

Please see the back of this flyer for details on the dos and don'ts of single stream recycling!

Thank you!

Moultonborough Select Board
